

**AMENDMENTS TO THE CLAIMS**

Please amend Claims 1, 7, 12, 13 and 16. Please cancel claims 2, 8 and

17. Following entry of the amendments in this Amendment, the pending claims in the present application read as follows:

- 1 1. (Currently Amended) An adhesive dispensing tape comprising:  
2 a flexible carrier tape having a transverse width defined by first and  
3 second edges and a longitudinal length; and  
4 a row of hot melt adhesive segments spaced apart along said  
5 longitudinal length of said carrier tape, each of said adhesive segments in said  
6 row of adhesive segments being disposed between said first and said second  
7 edges of said transverse width of said carrier tape; and  
8 ~~whereby a portion of said carrier tape may be transversely flexed to expose a~~  
9 ~~single adhesive segment to an abutting planar surface~~  
10 wherein each of said adhesive segments is individually exposable to an  
11 abutting planar surface when said carrier tape is transversely flexed.

- 1 2. (Cancelled).

- 1 3. (Original) An adhesive dispensing tape as defined in Claim 1, wherein  
2 said carrier tape has first and second release surfaces, and wherein said  
3 adhesive segments adhere less strongly to said second release surface than they  
4 do to said first release surface, whereby said carrier tape may be unwound

5 from a coil with said adhesive segments being retained on said first release  
6 surface.

1 4. (Original) An adhesive dispensing tape as defined in Claim 1, wherein  
2 each of said adhesive segments are disposed at a point that is centered along  
3 said transverse width of said carrier tape, wherein said adhesive segments form  
4 a substantially straight line in a longitudinal direction along said carrier tape.

1 5. (Original) An adhesive dispensing tape as defined in Claim 1, wherein  
2 said adhesive segments are disk-shaped.

1 6. (Original) An adhesive dispensing tape as defined in Claim 1, wherein  
2 said adhesive segments are disposed in a single row in a longitudinal direction  
3 along said carrier tape.

1 7. (Currently Amended) An adhesive dispensing tape comprising:  
2 a flexible carrier tape having a width dimension extending in a  
3 transverse direction and a length dimension extending in a longitudinal  
4 direction; and  
5 a series of hot melt adhesive segments non-contiguously staggered  
6 along said length of said carrier tape in the longitudinal direction, wherein a  
7 ~~portion of said carrier tape may be transversely flexed to expose a single~~  
8 ~~adhesive segment to an abutting planar~~ each of said adhesive segments is  
9 individually exposable to an abutting planar surface when said carrier tape is  
10 transversely flexed.

1     8.     (Cancelled).

1     9.     (Original) An adhesive dispensing tape as defined in Claim 7, wherein  
2     said series of said adhesive segments are substantially linearly disposed on  
3     said carrier tape along the length of said carrier tape.

1     10.    (Original) An adhesive dispensing tape as defined in Claim 7, wherein  
2     said width of said carrier tape is defined by first and second edges and wherein  
3     said series of adhesive segments is located along said length of said carrier  
4     tape between said first and second edges of said width of said carrier tape.

1     11.    (Original) An adhesive dispensing tape as defined in Claim 7, wherein  
2     said carrier tape has first and second release surfaces, and wherein said  
3     adhesive segments adhere less strongly to said second release surface than they  
4     do to said first release surface, whereby said carrier tape may be unwound  
5     from a coil with said adhesive segments being retained on said first release  
6     surface.

1     12.    (Currently Amended). An adhesive dispensing tape as defined in Claim  
2     11, wherein said adhesive ~~disks~~ segments have a diameter measured along said  
3     first release surface and are separated in the longitudinal direction by a margin  
4     at least equal to the diameter.

1     13.    (Currently Amended). An adhesive dispensing tape as defined in Claim  
2     11, wherein said adhesive ~~disks~~ segments have a diameter measured along said

3 first release surface and are separated in the longitudinal direction by a margin  
4 at least three times the diameter of the circular disks.

1 14. (Original) An adhesive dispensing tape as defined in Claim 7, wherein  
2 said adhesive segments are each disks having a generally circular  
3 configuration.

1 15. (Original) An adhesive dispensing tape as defined in Claim 7, wherein  
2 said adhesive segments are disposed in a single row in said longitudinal  
3 direction along said carrier tape.

1 16. (Currently Amended) An adhesive dispensing tape comprising:  
2 a flexible carrier tape having a transverse width defined by first and  
3 second edges and a longitudinal length comprising a plurality of adjoining  
4 longitudinal segments extending along the entire longitudinal length of said  
5 carrier tape, each of said longitudinal segments extending the entire transverse  
6 width of said flexible carrier tape; and  
7 a plurality of spaced-apart hot melt adhesive segments distributed on  
8 said carrier tape along the longitudinal length of said carrier tape, wherein at  
9 least one adhesive segment is disposed within each of said longitudinal  
10 segments on said carrier tape, and  
11 wherein each of said longitudinal segments contains the same number of  
12 adhesive segments disposed therein.

1 17. (Cancelled).

1 18. (Original) An adhesive dispensing tape as defined in Claim 16,  
2 wherein said adhesive segments are disposed on said carrier tape along the  
3 longitudinal length of said carrier tape in a substantially straight line.

1 19. (Original) An adhesive dispensing tape as defined in Claim 16,  
2 wherein each of said adhesive segments is disposed within one of said  
3 longitudinal segments at a point between said first and second edges of said  
4 transverse width of said carrier tape.

1 20. (Original) An adhesive dispensing tape as defined in Claim 16,  
2 wherein said carrier tape has first and second release surfaces, and wherein  
3 said adhesive segments adhere less strongly to said second release surface than  
4 they do to said first release surface, whereby said carrier tape may be unwound  
5 from a coil with said adhesive segments being retained on said first release  
6 surface.

1 21. (Original) An adhesive dispensing tape as defined in Claim 16,  
2 wherein only a single one of said adhesive segments is disposed within each of  
3 said longitudinal segments on said carrier tape.

1 22. (Original) An adhesive dispensing tape as defined in Claim 16,  
2 wherein said adhesive segments are disposed in a single row in said  
3 longitudinal direction along said carrier tape.
